March 2019 OUR 53RD YEAR

WELCOME TO MARCH. We haven't recovered from the onslaught of late February new titles — they're still pouring into the warehouse — and here we are with a robust list of March releases. There's no end in sight.

A recent new release, ANTHEM, arrived in the warehouse with a surprise: both the PlayStation 4 and Xbox One versions require users to have a paid subscription. Our policy has been to omit these sorts of titles from our monthly announced products but, over time, it has become clear that most of our libraries do want them. Patrons have the subscriptions and are keen to get their hands on these — oftentimes — blockbuster titles. So, going forward, we're going to include these titles but include an alert in the product description. If you know that your library does NOT want these kinds of titles in your collection, send me an email and we will mark your account accordingly. It is becoming increasingly difficult to determine which titles just won't work for library circulation, but we're working hard to keep up with the information.

Spring is coming. I think we're ready. Yes?
